

BACKHOE/EXCAVATION-

Course Description-

This course will teach the basic knowledge, terms, safety, maintenance and the operation of backhoe equipment.

Rules to Dig By will be covered as well as proper setup and technique for digging. Also, will go over maintenance and "what if" situations needed on the job.

Classes can be held in any weather utilizing our large garage building.

The students will participate in a variety of real-world skill games that give them the understanding and experience to perform on the job. Backhoe and skid steer are covered so upon completion they are a competent operator for their job.
